**Patrizia Lo Sciuto**

communication and school projects

We met students of primary schools of Capannori to involve in problem of plastic residual (disposable) in the sea

Interpolazione GIS dell'abbondanza di rifiuti sul fondo marino nell'area di competenza di ARPAT nell'ambito del progetto Raccolta Dati dell'UE.

We speak about how much disposable waste a family produce... in a day

# In a birthday party...

Children have thought how to change these habits and they have achieved some works about the solution...

MAI PREPARARE I CAFFÈ  
UTILIZZANDO CAPSULE  
MONOUSO.

# Another step

Children sent a letter to publisher of figurines album to ask that figurines are in laminated paper.

**They can't recycled it!**

Pizzardi publisher said that has decided to produce figurines in certified recycle paper for 2012 album...

# BEST PRACTICES in school...

## Problem

Disposable paper

## Solution Towels

# Capannori school is self-financing

**1000 children** and their parents every day **collect paper**.... And then **they sell paper** that goes into recycling bin...

**Paper is weighed once week**, then material is sold to Comieco (a recycling cooperation). Money is given to schools and they reinvested it in different educational materials.

# RIFIUTI ZERO

*“Passi concreti verso Rifiuti Zero”*  
*Comune di Capannori*

**GRACIAS!**
